Figure 1. Source Geometry .....	2
Figure 2. Output Parcel GML & Seedpoint GML files with source geometry overlaid .....	3
Figure 3. Sample of Folio attributes in CSV file .....	4

## General

Customers may request a 'spatial query' to be carried on their behalf or order an electronic extract from the Registry's digital vector map (through the Spatial Information Unit).

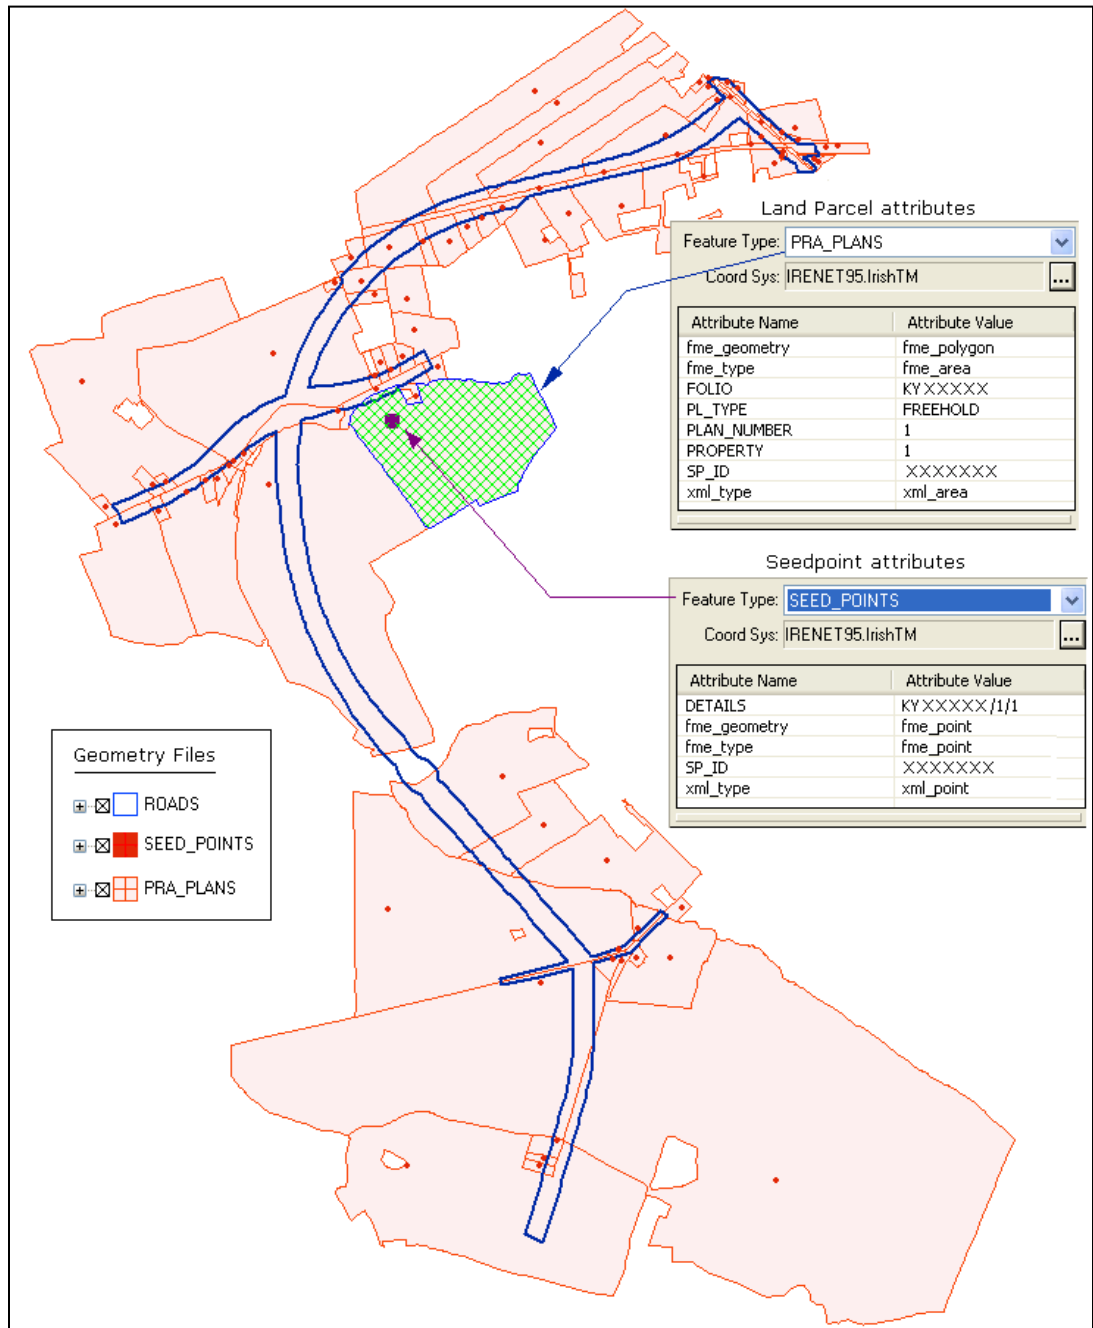

**Figure 1.** Source Geometry

The output from the spatial query will consist of files comprising parcel and seedpoint geometry (Fig 2) together with a **CSV** file (Fig 3).

Area Burdens, Line Burdens and Point Burdens (see Mapping Guidelines Appendix 9) will not be included as part of the output from a spatial query unless specifically requested at the time of application.

The map output format will be GML (**G**eography **M**arkup **L**anguage). GML is the format recommended in the INSPIRE directive for exchange of Spatial Data). Other geometry formats can be produced on request.

**Figure 2.** Output Parcel GML & Seedpoint GML files with source geometry overlaid

The CSV file will consist of an extract of Folio attributes for the parcels that are included in the GML extract:-

- Folio
- Prop\_Num
- Plan\_Number.
- Owner\_ Name(s) Currency of owner name is dependent on the timing of applications being lodged to update the Register
- Appl\_Num. Lists applications pending (if any) against Folios
- Addr This is the address for service of notices in the state
- Seed point X and Y ITM coordinates
